

TopResponse Threat Advisory

Release Date: February 15, 2008

Purpose: The Top Layer TopResponse team is issuing an advisory, which provides information needed to block attacks for the Microsoft IE Argument Handling Memory Corruption (CVE-2008-0078).

Top Layer Products: IPS 5500 E-Series.

Vulnerable Infrastructure: Internet Explorer v5.01, v6, v6 SP1, and v7; Microsoft Windows 2000 SP4, XP SP2, Server 2003 SP1 and SP2, Vista, Vista x64 Edition.

Alert Type: Critical Vulnerability

Risk Assessment: Critical

Threat Impact: Remotely exploitable vulnerability that could allow an attacker to control vulnerable systems

Advisory Impact: Prevention

Summary: The Microsoft Internet Explorer image processing argument validation implementation contains a vulnerability. The reported vulnerability could allow an attacker to execute arbitrary code on the users systems in the security context of the logged-on user by enticing the user to open a specially crafted web page.

Recommended Action: Top Layer recommends the following actions:

Download and apply Protection Pack 2008-02-13-02 (or later) to put this new protection into place. This is automatically applied to the “Recommended Client Protection” IPS Rule Set. In order to take advantage of the protection, make sure the IPS rule tln-106178 is enabled in the IPS Rule Set used to inspect traffic from your client infrastructure.
